--> Comment Text :
First, I regret that Secretary Abraham did not appear at this very important meeting to the people of NV. His absence reflects poorly on the Bush Administration's sincerity and increases the lack of trust for this administration by the people of NV. His disdain is quite evident and is appalling and insulting. What arrogance!

The basic unfairness of making NV the nuclear garbage dump for the nation & other countries is outlandish. No state should be destined for such disdain from a government that claims to serve the people. You want our taxes without giving us the protections that provide us with health and welfare, safety and security, and the right to live in peace and freedom.

Did our leaders learn anything since the unleashing of nuclear testing? Is the population of NV and other states considered expendable to our leaders when the dangers of transport threaten the lives of all around the transport of the dangerous cargo?

I concur with the concerns expressed by our NV leaders and other concerned citizens at the "hearing", who express my own displeasure about the process and the corruption

that is obviously at work in this project, and offer the alternatives that would be way more acceptable.

The lack of honest thorough study of this project is scandalous, and has once again deteriorated into a political power play and energy gusher for business while sacrificing the very people that pay the bills.

Stop this project. It would not be a loss considering the great amount of knowledge that has been gained. The question: Is President Bush, his Administration and Congress able to show humility and do the right thing for all that would be endangered by the this project.

I see this as one more nail in the coffin of our nation. History does repeat itself. Why can't people learn from history? We are obviously the disposable society/nation.
